Training Course in EMG and Neurography

Clinical Neurophysiology of the Peripheral Nervous system

Uppsala October 23 – 27, 2006

Organizer: Department of Clinical Neurophysiology, Uppsala University Hospital. Erik Stålberg course director, Roland Flink course administrator

Faculty: Erik Stålberg, Roland Flink, Uppsala staff members and Björn Falck, Turku Finland

Description: The course is a comprehensive training course and includes EMG, neurography and modification of these techniques.

Language: English

Participants: The participants are supposed to have basic knowledge in the field of EMG and neurography. The course will be of interest for clinical neurophysiologists in training (part of the Swedish residency program, SK-kurs), neurologists, biomedical technicians and for those referring patients to the EMG lab such as handsurgeons, neurosurgeons, ortopedic surgeons, pediatric neurologists, medical rehabilitation physicians.

Content: Basic anatomy and physiology or nerve and muscle, recording and analysis methods for routine and research, indications for EDX, typical findings in nerve and muscle disorders, pediatric aspects of Clin Neurophysiology, intraoperative monitoring and short comments on other fields. In addition some new methods will be demonstrated and discussed.

Registration: Number of participants restricted to 20. Acceptance on First come, first served basis. Cost 600 € (includes course material, coffee, one dinner but not lunches).

Deadline: May 31.

Address: Registration form: www.neurofys.uu.se
